

## DIRECTIONS FOR USE

Protect hands with solvent-resistant gloves and eyes with chemical splash goggles.

**Directions for Use on Iron, Steel, or Other Metal Surfaces:** 1. Remove loose rust scale using a scraper or wire brush. 2. Remove oil and dirt using Prep-All® Wax & Grease Remover or other hard surface cleaner.

3. Brush a heavy coat of Rust Remover on all rusted areas. 4. Allow 5-10 minutes for remover to begin dissolving light rust. Heavily rusted areas may take several hours. 5. Once the rust is dissolved, scrub to remove rust from the surface. Flush with water and allow to dry. Repeat application for stubborn rust. 6. Apply anti-corrosion coating to cleaned surfaces to prevent new rust from forming.

**To Remove Rust Stains on Concrete, Ceramic, Tile and Porcelain:** 1. Apply.

2. Wait one minute and wipe with a damp cloth. 3. Make sure no spatters remain on the surface as discoloration may occur.

**Note:** This product may not be compatible with all surfaces and all conditions surrounding application. Before applying to any surface, always test product in a small, inconspicuous area to ensure no damage will result. **Severely rusted surfaces may be too damaged for restoration. This product does not cure damage caused by rust. Test structural integrity of item before returning to use.** Do not use on glass, marble, or limestone surfaces. Avoid direct sunlight or strong breezes.
